BakeryInfo Sys is an information management system developed by Aabishkar Aryal and Nishan Timalsena as part of 1st course work for 2nd year assigned by London Metropolitan University.

This software is can perform information management functions for bakery.

This software is made with mindset of providing user with wide range of functions that can help them in their business and also provide an elegant User Interface that can be used with touchscreen too.

Developers Information and Contact

Developed by: Aabishkar Aryal & Nishan Timala

Contact Email: np01cp4s180039@islingtoncollege.edu.np (Aabishkar Aryal)

All the functions and designed are developed and implemented by the above-mentioned developers.

Icons used in this program were free icons provided at icons8.com and are properties of respective owners.

Add items in the table

You can add new items in the table by entering various details in the text fields.

Search

Press the enter button after adding details in the fields.

The information is added to the table after clicking the enter button.

How to search?

There are two ways to search:

1. By price
2. By category

1.By price

To search by price just enter the price that you want to search on the text field located at the bottom with the label price and click search button.

By Category

To search by category, select the category tab at the bottom and select the category that you want to search and click search button. The result will be displayed on a pop-up box
